

Earlybird™

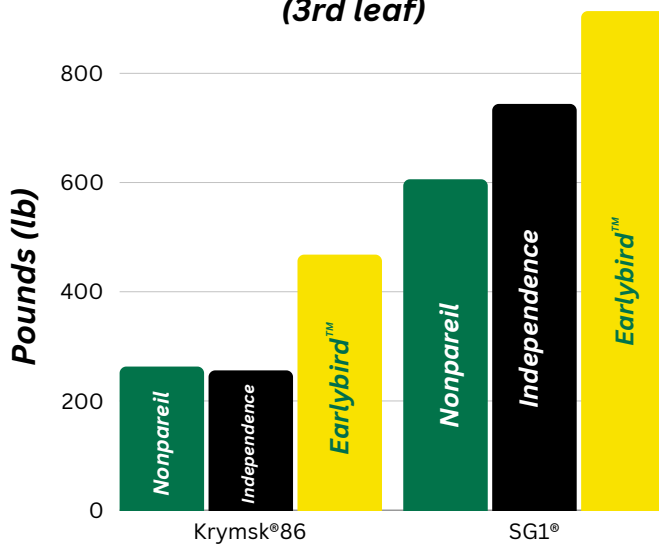

Self-fertile almond variety from Sierra Gold Nurseries

Harvesting a full week before Nonpareil, this vigorous cultivar shakes clean and showcases superior in-shell potential with its paper shell. Notably resilient against NOW due to an excellent shell seal. It produces kernels 20% larger than Nonpareil and achieves a crackout rate 6% higher.

**2023 Yield Data
(3rd leaf)**

Very high yielding

Shakes clean!

**Harvests 1 week before
Nonpareil**

No double kernels

Light kernel color

**Vigorous tree that fills
canopy well**

**Paper shell lends to excellent
in-shell potential**

**Reduced NOW vulnerability
due to excellent shell seal and
early harvest.**

Large kernel size

**Crackout 64%, where
Nonpareil was 58% and
Independence was 59%**
